

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the visibility and usability of its interactive controls, which is being bled by 41 unlabelled buttons that screen readers and voice control cannot address, directly undermining trust and accessibility for a significant user segment.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Heavy script load Homepage loads 63 scripts, likely slowing interaction readiness and hurting conversion.	High	Medium	5/10
2	Heavy third-party script load The homepage loads 63 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
3	Unlabelled controls 41 of 79 buttons have no accessible name, making them unusable for assistive technology users.	Urgent	Low	2/10
4	Missing alt text 3 images lack alt text, losing assistive tech support and image-search traffic.	Medium	Low	2/10
5	Controls without accessible names 41 of 79 buttons expose no text label, so screen readers and voice control cannot address them and the...	High	Low	2/10
6	Images missing alternative text 3 of 43 images carry no alt attribute, losing both assistive technology support and the image-search traffic...	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
